

**12/12/2012**

**Beginning of civil works and gas turbine concreting in the Fast Track Project in Jordan.**

The project includes the engineering, procurement, construction and commissioning of one 146 MW Alstom GT13E2 gas turbine and all auxiliary equipment. ELEMKA proceeds with the construction works, having already completed the mobilization phase as well as the first phase of concreting the GT pedestal. At the same time, the excavations of all critical structures have been completed, and the concreting of the Exhaust Stack, Auxiliary Modules, E-Modules and underground networks is ongoing.
